MUHAMMAD YUNUS

Full-Stack Software Engineer • Next.js 16 • TypeScript • Node.js • Cloud

Cairo, Egypt (EET / UTC+2) • Open to Remote & Relocation Phone/WhatsApp: **+20 1025-689042** Email: **myunus.info@gmail.com**
Portfolio: **yunusportfolio-ten.vercel.app** LinkedIn: **linkedin.com/in/yunus-profile** GitHub: **github.com/myunus-info**

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of software development experience (programming journey begun in January 2020 through intensive tracks across **Creative IT, Pondit, Programming Hero, and extensive Udemy coursework**). Maintained an unbroken dedication to mastering modern web architecture and AWS/cloud systems concurrently alongside internships and US client contract work. Proven track record architecting modular backend services for enterprise logistics systems (DaakBangla) and building production platforms with **Next.js 16 (App Router), React 19, TypeScript, NestJS, and PostgreSQL**. Skilled in transactional database modeling (TypeORM, Prisma), Redis caching, and Docker containerization on AWS.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3, Bash
Frontend: Next.js 16 (App Router, Server Actions), React 19, Tailwind CSS v4, Shadcn UI, TanStack Query v5, Redux Toolkit, Zustand
Backend & APIs: Node.js, Express.js, NestJS, RESTful APIs, WebSockets (Socket.io), JWT, OAuth 2.0, Microservices, MVC Architecture
Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis (In-Memory Caching), Prisma ORM, TypeORM, AWS (EC2, S3, Lambda), Docker, Git

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer • Independent Project Engineering 2023 – Present | Remote

- Undertook dedicated advanced engineering specialization; architected and shipped production platforms (DevJudge, GearUp) utilizing Next.js 16 App Router, React 19, NestJS, and PostgreSQL.
- Engineered complex backend integrations including database transactional row-locking (SELECT FOR UPDATE), in-browser Web Worker sandboxes, and full-stack type safety with Prisma and TypeORM.

Full-Stack Software Engineer (Contract) • US Client July 2022 – Jan 2023 | New York, NY (Remote)

Core Software Engineer on 'DaakBangla' – enterprise courier and parcel logistics platform prototype

- Architected backend RESTful services and dispatch workflows for **DaakBangla**, an enterprise-grade nationwide parcel delivery and courier logistics platform prototype.
- Engineered normalized PostgreSQL and MySQL schemas with compound indexes, achieving sub-100ms response benchmarks during staging load tests.
- Integrated Redis in-memory caching for merchant reporting dashboards and package status lookups to prevent database bottlenecks under concurrent access.
- Designed secure authentication workflows utilizing JWT HTTP-only cookies and Role-Based Access Control (RBAC) across dispatchers, couriers, and merchants.
- Containerized microservices using Docker and configured AWS staging pipelines (EC2, S3), adhering to modular clean architecture principles.

Software Engineer (Intern) • Aurora IT May 2022 – June 2022 | Dhaka, Bangladesh

- Developed internal dashboard modules and RESTful endpoints using Node.js, Express, and JavaScript within an Agile sprint team.
- Authored automated integration and unit test suites, expanding test coverage across core API routes by **25%**.

FEATURED PROJECTS

DevJudge – Automated Code Assessment & Live Coding Arena Live Demo | Client Repo | Server Repo

Next.js 16, React 19, TypeScript, Monaco Editor, Tailwind CSS v4, TanStack Query v5, Zod

- Built an in-browser code evaluation environment leveraging Web Workers and Monaco Editor, running untrusted candidate JavaScript with strict 2.0s execution timeout guards.
- Engineered a 3-step recruiter assessment wizard with configurable test cases, scoring criteria, and real-time candidate leaderboards.

GearUp – Outdoor Equipment Rental Marketplace Live Demo | Client Repo | Server Repo

Next.js 16, NestJS, TypeScript, TypeORM, PostgreSQL, Stripe API, Tailwind CSS, Shadcn UI

- Architected a two-sided gear rental marketplace with 3 role-specific dashboards (Customer, Provider, Admin) for rental workflows, gear CRUD, and order fulfillment.
- Implemented database transactional row-locking in PostgreSQL via TypeORM to eliminate concurrency race conditions and prevent equipment double-booking during checkout.

EDUCATION & TECHNICAL TRAINING

Uttara University • B.A. (English)

CGPA: 3.92 / 4.00 • Focus: Technical Writing & Analytical Problem Solving. 4+ years continuous self-directed CS & system design study (begun Jan 2020).

AWS Certified Cloud Practitioner

Amazon Web Services (Issued: Nov 2022) • Specialized Full-Stack & AWS/Cloud Training: **Creative IT, Pondit, Programming Hero, and extensive Udemy tracks** (maintained continuous skill growth alongside jobs and internships).
